

Symposium 5.5

Dynamic interplay of manual and postural behaviors across timescales in early development

1. **Manual sampling in free-flowing conditions: real-time interaction between body position and object in 4, 6 and 9-month-olds**

Agata Koziol - Institute of Psychology, Polish Academy of Sciences, Warsaw

2. **Walking-Related Changes in Infants' Object Interaction Experiences throughout the Day**

Yushan Guo - Department of Psychology, University of California

3. **Tiny hands, big transitions: Analyzing crawling infants' target interactions during play as they learn to walk**

Dr. Sabrina L. Perkins - Department of Psychology, Elon University

4. **Discussion**

Dr. Lana Karasik - City University of New York

Manual sampling in free-flowing conditions: real-time interaction between body position and object in 4, 6 and 9-month-olds

Agata Koziol¹, Joanna Duda-Goławska¹, Zuzanna Laudańska², Hana D'Souza³ and Przemysław Tomalski¹

¹ Babylab PAN, Institute of Psychology, Polish Academy of Sciences

² Department of Child and Adolescent Psychiatry, Heidelberg University Hospital, Heidelberg University

³ Centre for Human Developmental Science, School of Psychology, Cardiff University
